BRIGHTMOOR COLLEGE OF ENGINEERING - HACKSPRINT 2026 ORGANISING COMMITTEE

INCIDENT REPORT HS26-IR-014
Filed: 2026-11-19 15:00 IST
Prepared by: Farah Qureshi (Committee Coordinator)
Technical support: Sundar Pillai (BCE IT Services)

1. WHAT WAS REPORTED

Team LumenPath says its unreleased route-planning prototype (repository hacksprint-lumenpath/lumenpath-prototype, private, on git.bce.example) is in the possession of competing Team Nimbus.

TIME	EVENT
2026-11-18 09:40	Team Nimbus submitted its entry "NimbusNav".
2026-11-18 11:20	Nimbus published a teaser video.
2026-11-18 11:31	LumenPath members recognised their route-scoring screen in the teaser and told the committee.
2026-11-19 09:30	A judge compared the two projects.
2026-11-19 14:20	Team Nimbus agreed to cooperate; its formal statement is being added to the case file later.
2026-11-19 14:35	Nimbus's team lead forwarded one email he had received before the submission.
2026-11-19 16:10	Scheduled: IT inspection of a USB drive handed over voluntarily by a LumenPath member (see section 3).

2. RECORDS COLLECTED BY BCE IT

Repository audit exports (commits, sessions, downloads, CI), campus web gateway log, DHCP/NAC device records, card-access and Wi-Fi association logs, lab endpoint-monitor logs, Campus Alias Service log, chat exports and mail provided by the people involved.

3. AUTOMATED ALERT ALREADY ON FILE

```
EPA-2217  2026-11-17 21:10:12  Lab endpoint monitor, host LAB-PC-14:
USB write of 38.9 MB by user kabir.s. Severity MEDIUM. Not previously
investigated.
```

4. WORKING RULES FOR THIS INVESTIGATION

- All times are IST. Records are exported as-is by IT and have not been independently validated.
- Logs identify accounts, tokens, IP addresses and devices - not people.
- The five people with legitimate repository access are listed in the access roster. Each has a reason to be looked at; none has been accused.
- The committee needs a reasoned conclusion before the final demos on Friday 2026-11-20.
