INTERVIEW SUMMARIES - Case HS26-IR-014

Conducted 2026-11-20 09:00-11:30 by F. Qureshi.
These summarise what each person SAID. They are not verified facts.

AARAV MENON (aarav.m, team lead, repo admin)

- Made a full web export on the night of 16 Nov as a local backup and told the team in chat.
- On the evening of 17 Nov he was in Hostel A on his own laptop; he reviewed and merged Diya's branch at about 23:12.
- His account was hit by failed logins early on 16 Nov; 2FA is on. He did not contact Nimbus.

DIYA KAPOOR (diya.k, backend developer)

- Owns CI token lp-ci-token-02 and put its value in the team pad on 15 Nov.
- Says she did NOT create the 17 Nov 23:41 export. She says she was in the library, 2nd floor, with her laptop until closing time, then walked back to Hostel B.
- Says her late login that night came from her phone's hotspot, to read comments on a pull request.

KABIR SETHI (kabir.s, frontend developer)

- Copied the repo from main onto a USB drive at the lab on 17 Nov for an offline demo laptop. The drive stayed in his bag; he gave it to IT voluntarily.
- Has a friend on Team Nimbus (Tanvi Desai) but says he only shared a poster template with her.
- Borrowed Meera's laptop in the lab on 16 Nov to test the heatmap. After leaving the lab on 17 Nov he went to Hostel C.

MEERA JOSHI (meera.j, data / visualisation developer)

- Says she worked on the heatmap module in the lab on 17 Nov "until about midnight" and then went to sleep. Says her laptop was with her all night.
- Was unhappy that the heatmap was cut from the demo but says she "would never hurt the team".
- Knows the token value from the team pad. Says she has never contacted anyone on Team Nimbus and does not know who "Lantern" is.

PROF. NEELAM RAO (n.rao, faculty mentor, read-only)

- Has had read access since 11 Nov; cloned once on 12 Nov and viewed the web dashboard on the morning of 17 Nov.
- Advises Team Nimbus too (declared) but says she never shared LumenPath material. Left campus at about 18:40 on 17 Nov.
