INVESTIGATION QUESTIONS - Case HS26-IR-014

Keep answers short. For every important claim give a filename plus a timestamp or record ID.

QUESTIONS

1. What most likely happened? (2-3 sentences)
2. Who is responsible?
3. How was the prototype transferred, from the repository to Team Nimbus?
4. Which account, device or session was involved? Say which of these you can prove and which you are inferring.
5. Give the event timeline (key events with times, from first relevant event to Nimbus's first commit).
6. Which records support your conclusion? (filename + timestamp/record ID)
7. Does the USB-drive evidence prove how the leak happened? Explain.
8. Which of the other suspects can you eliminate, and why for each?
9. Which records are misleading, routine or irrelevant? Why do they look suspicious and what explains them?
10. What is the strongest alternative explanation, and why do you reject it?
11. If uncertainty remains, what additional evidence would you request?

CHECKPOINT PROMPTS (the organizer will tell you when to write each one)

Checkpoint 1 - after your first round of evidence:

(a) How did the copy reach Team Nimbus, and when?

(b) Which theories and suspects are still open?

(c) Which records push towards the USB drive and which push elsewhere?

Checkpoint 2 - after your second round:

(a) Which export/download created the copy that was leaked?

(b) Which account or token, and which IP address, are involved?

(c) Is the USB drive still a serious candidate? Why or why not?

Final submission - after your last round: Answer Questions 1-11 in full.

SUBMISSION FORMAT

Team name, then answers numbered 1-11. Maximum about one page.
